

CENTER PCS

Port Community System

Sharing facilitates growth.

CENTER PCS

CENTER PCS (Port Community System) is a secure, cloud-based software solution that connects and integrates governmental and private sectors into a Single Window system. All stakeholders provide, share, and benefit from the provided information through a centralized web-enabled platform.

This platform will improve nationwide information flows and accuracy of statistics, by using real time data input. Information is gathered from all maritime and air modalities arriving or departing a country, as well as from its cargo and passengers.

EXPERIENCE THE BENEFITS

- Agents have one single window to declare vessel related information.
- Customs knows which vessels and which containers require inspection.
- Law enforcement will see the huge amount of paperwork reduced significantly.
- The government knows what to plan ahead for, when and how to grow.
- Retailers know exactly when a ship will arrive and how many visitors are on board.
- Compliance to the IMO FAL Convention.

- Cloud based system
- Secure
- Web access
- Push data and notificatons
- Single window
- Compliance to the IMO FAL Convention
- Real time information
- Optimized for mobile devices

THIS NETWORK OF KNOWLEDGE WILL CHANGE EVERYTING.

CENTER PRODUCTS MANAGE CRUISE, PORT, AND TERMINAL RELATED WORKFLOWS.

Our center product line consists of seven software products, that manage: "Terminal, Port, Freight-forwarding, and Agencies" related activities and workflows. The products can be used as standalone applications, a combination of CENTER products is also possible.

For more information about the CENTER products, please take a look at our brochures or visit our website at www.itpartner.nl.
